Addressing Chip Seal Concerns

The City of Eau Claire Street Division is responsive to citizen concerns about loose gravel, and the dust associated with chip sealing. Steps to improve the overall conditions during the project include the following:

- Placing signs to warn of loose gravel.
- Conducting street sweeping of chips within 24 to 48 hours after the chips are applied to the street surface.

Please slow down and use caution when driving on freshly chip sealed streets.

Contact Information

If you would like additional information regarding this years' Chip Seal project, please call during regular business hours of 8 a.m. to 4 p.m., Monday through Friday. 715-839-4963.

Chip Seal Project

The chip sealing program is designed to improve the quality of your street and to delay the need of resurfacing or total reconstruction. Chip sealing is a cost effective preventative maintenance method, used to extend the useful life of Eau Claire streets. It is intended for application on streets that are still in good condition, structurally sound, and in need of little repair.

The City's annual chip sealing street maintenance program will begin the week of June 14, 2021, (weather permitting). This will involve approximately 8 miles of city streets. Chip sealing is a process that involves applying emulsion oil and chips (3/8" fractured washed granite) to the streets surface. The chips are compacted into the emulsion oil and left to cure for approximately 24 hours. The contractor, Scott Construction, is scheduled to complete the application of oil and chips by June 25, 2021, (weather permitting).

 ** WEATHER PERMITTING ** Rain will delay the chip seal process, up to a day or two.

Drivers should expect delays/detours, and, obey all construction signage and temporary "No Parking signs".

*Connecting streets listed on the next page could result in traffic delays, and temporary street closures.
